* Percentages represent the number of majority opinions authored divided by the number of times a Justice was in the majority for a *signed* opinion. As such, 5-4 *per curiam* opinions are omitted entirely.

Oral Argument

The number of “questions” per argument is simply the number of times a given Justice’s name appears in the argument transcript in capital letters. In order to account the Chief Justice’s administrative comments, his tally for each case has been uniformly reduced by three questions in each case.

Pace of Grants

The following chart plots the pace at which the Court fills its merits docket for a given Term. Each date marker represents the conference within a given sitting. For instance, Feb #3 is the third February conference, which actually took place on March 4, 2011. Categorizing grants by their conference within a given sitting ensures more accurate cross-term comparisons.

Pace of Opinions

The following chart plots the pace at which the Court releases merits opinions throughout the Term, beginning in October and ending in June. This chart includes both opinions released after full briefing and summary reversals. Here, as in the Pace of Grants chart, cases are categorized by their release within a given sitting, rather than by calendar month. For example, opinions for Feb. #3 could be released during the first week of March.

Voting Alignment - All Cases

Cases are sorted by date of decision. Dissenting Justices are shaded in grey and the author of the majority opinion is highlighted in red.
