Cases Set for Argument During OT18	23
---	----

* You can find past Stat Packs here: <<u>http://www.scotusblog.com/reference/stat-pack/></u>. A few matters regarding our methodology are worth mentioning at the outset. First, SCOTUSblog treats consolidated cases as a single case, as determined by the case with the lowest docket number (prior to the release of an opinion) or the case that is captioned with an opinion. To the extent that two cases are argued separately but later decided with only one opinion, we will remove one of the cases from this Stat Pack, except to include it in the Pace of Grants chart to maintain cross-conference comparisons. The most unusual way we manage these later-consolidated cases is to merge the oral-argument data for the two cases. We combine the questions asked by each justice in the separate oral argument proceedings into one "consolidated" session. Second, this Stat Pack frequently uses the term "merits opinions," "merits docket," or "merits cases." Those three terms are used interchangeably, and signify the set of cases decided "on the merits." Those cases include signed opinions after oral argument (the bulk of all merits cases), most per curiam opinions released after oral arguments, summary reversals (cases decided with per curiam opinions on the merits or oral argument, often to reverse a lower court), and cases decided by an equally divided (4-4) court. Cases that are dismissed as improvidently granted are not included in our tally of merits cases.

** Washington v. United States, in which the court split 4-4, is listed as a case granted from the Ninth Circuit and subsequently "decided." However, we did not include the affirmance of the Ninth Circuit in the number of Ninth Circuit cases affirmed, 2.

^{*} For the circuit scorecards only, we treat certain consolidated cases as separate decisions rather than as one. For consolidated cases that stemmed from different lower court decisions, such as the cases consolidated as *Epic Systems Corp. v. Lewis*, we counted the cases separately on this table to most accurately reflect the Supreme Court's treatment of the precedents below. For cases that were consolidated in the court below, such as the three petitions from the U.S. Court of Appeals for the 2nd Circuit in Ziglar v. Abbasi, Ashcroft v. Abbasi, and Hasty v. Abbasi (OT16), we counted the Supreme Court's decision only once. Throughout the rest of the Stat Pack consolidated cases are uniformly treated as a single case.

* We treat cases with eight or fewer votes as if they were decided by the full court. For 8-0, 7-1, and 6-2 decisions, we simply assume that the recused justice would have joined the majority. In cases that are decided 5-3, we look at each case individually to decide whether it was more likely that the recused justice would join the majority or the dissent. Our assumption that nine justices voted in each case applies only to figures that treat each case as a whole, like the chart above, and not to figures that focus on the behavior of individual justices, like our Justice Agreement charts.

** For cases that are decided by a 5-4 vote, we provide information about whether the majority was made up of the most common conservative bloc (Roberts, Kennedy, Thomas, Alito and Gorsuch), the most common liberal bloc (Kennedy, Ginsburg, Breyer, Sotomayor and Kagan), or a more uncommon alignment. A conservative line-up is marked with a red square, a liberal line-up is marked with a blue square, and all others are marked with a yellow square.

***For per curium opinions, we assume that all justices who do not publicly dissent voted with the majority.

Make-Up of the Merits Docket

The following charts depict different characteristics of the cases that were released with merits opinions. These charts include information about cases disposed of with signed opinions, summary reversals, or affirmances by an equally divided court.

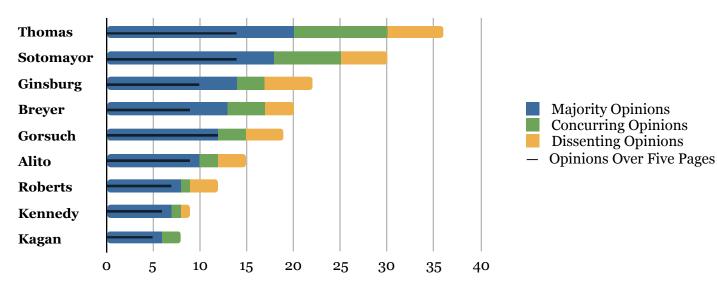

* Technically, all paid and in forma pauperis cases have been on the same docket since 1971, with paid cases beginning each year with case number 1, and IFP cases beginning at number 5001. Accordingly, the first paid case of this term was numbered 15-1 and the first IFP case was numbered 15-5001. Original cases remain on a separate docket and follow a separate numbering convention. For more information on the dockets, see EUGENE GRESSMAN ET AL., SUPREME COURT PRACTICE 55–56 (9th ed. 2007).

Total Opinion Authorship

Unanimity

To take a closer look at unanimity at the court, we created three distinct measures of unanimity. The measures of unanimity are defined as follows:

Measure #1: When all justices simply voted for the same judgment - i.e., whether to affirm or reverse the judgment below. This is the broadest measure of unanimity because it allows for justices to write separate opinions - and sometimes even conflicting ones - as long as each justice voted to affirm or reverse the decision below.

Measure #2: When all justices joined some part of the same majority opinion, but one or more justices (1) wrote separately to state an individual position or (2) did not join the majority opinion in full.

Measure #3: When all justices joined a single majority opinion in full, and without any justices writing separate concurring opinions. This is the narrowest measure of unanimity because it requires that the justices agree in full and without any written reservations or additions.

	Measure #3	All Justices In Total Agreement	18	33%
	Measure #2	All Justices Join The Majority Opinion	24	44%
	Measure #1	All Justices Vote For The Same Judgment	27	49%

Justices Disagree On Whether To Affirm, Reverse, Or Vacate The Decision Below	28	51%
--	----	-----

* Note that Measure #2 incorporates the cases captured in Measure #1, just as Measure #3 captures those cases included in Measures #1 and #2. For more information on our measures of unanimity, see Kedar S. Bhatia, *A Few Notes On Unanimity*, SCOTUSBLOG (July 10, 2014 10:40 AM), http://www.scotusblog.com/2014/07/a-few-notes-on-unanimity/.

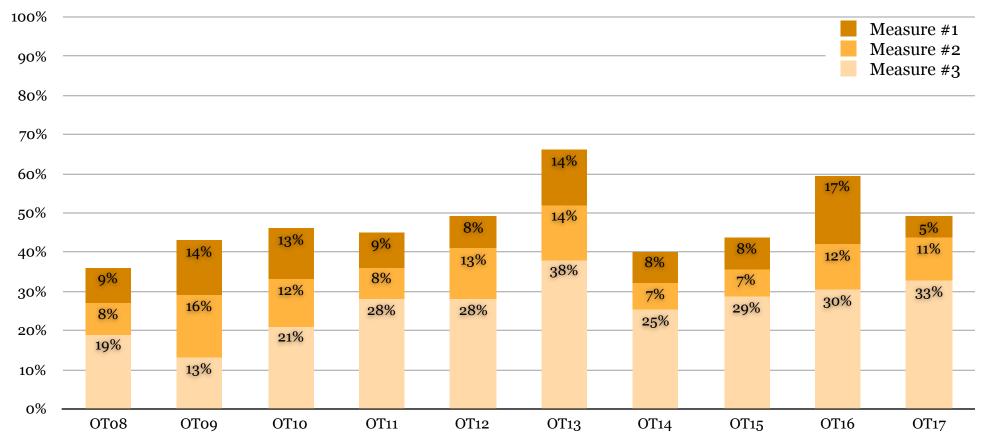

Unanimity

To take a closer look at unanimity at the court, we created three distinct measures of unanimity. The measures of unanimity are defined as follows:

Measure #1: When all justices simply voted for the same judgment – i.e., whether to affirm or reverse the judgment below. This is the broadest measure of unanimity because it allows for justices to write separate opinions — and sometimes even conflicting ones — as long as each justice voted to affirm or reverse the decision below.

Measure #2: When all justices joined some part of the same majority opinion, but one or more justices (1) wrote separately to state an individual position or (2) did not join the majority opinion in full.

Measure #3: When all justices joined a single majority opinion in full, and without any justices writing separate concurring opinions. This is the narrowest measure of unanimity because it requires that the justices agree in full and without any written reservations or additions.

Frequency in the Majority

The following charts measure how frequently each justice has voted with the majority during October Term 2017. The charts include summary reversals but do not include cases that were dismissed.

Justice	Votes	Freq	uency in Majority	OT16	OT15	OT14	OT13	OT12	OT11	OT10

Membership in a 5-4 Majority

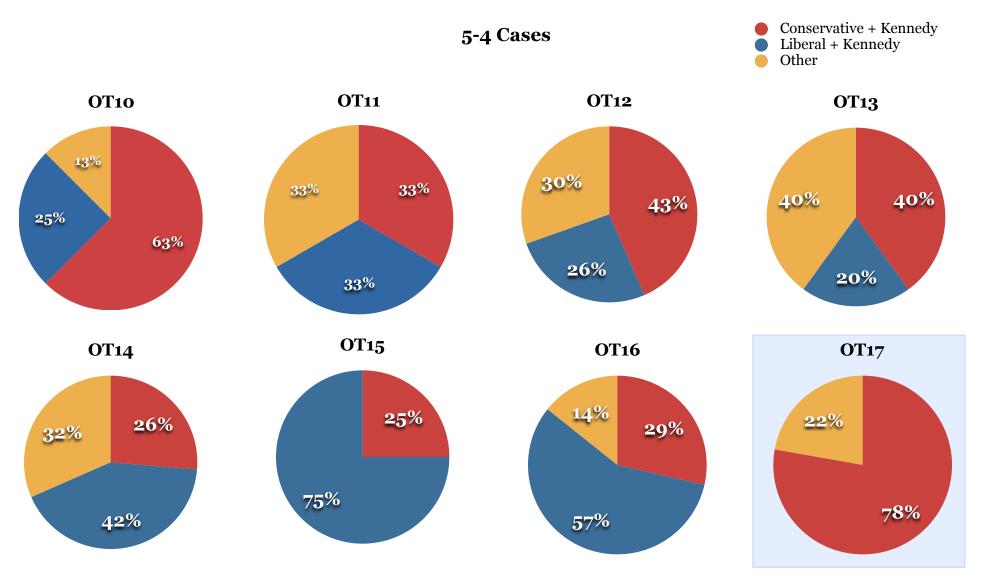

5-4 Majority Opinion Authorship

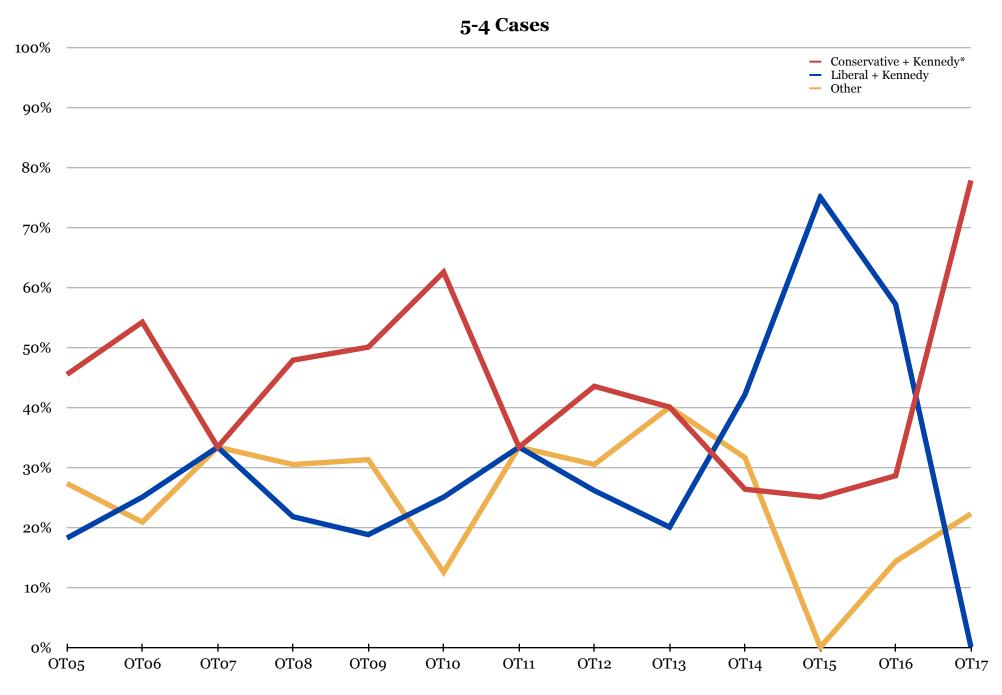

These percentages consider how often a justice authors the majority opinion when that justice is in the majority.*

Justice	Cases Decided	Frequency in the Majority	Opinions Authored	Frequency as Author	OT16	OT15	OT14	OT13	OT12	OT11	OT10
Ginsburg	9	2	1	50%	20%	0%	25%	0%	10%	0%	33%
Kagan	8	2	1	50%	20%	0%	10%	60%	10%	17%	о%
Gorsuch	9	8	3	38%	0%	-	-	-	-	-	-
Alito	9	7	2	29%	0%	100%	33%	33%	46%	33%	о%
Kennedy	9	7	1	14%	50%	50%	14%	30%	20%	33%	21%
Thomas	9	7	1	14%	33%	о%	0%	20%	13%	о%	33%
Roberts	9	8	0	0%	0%	о%	20%	14%	14%	10%	30%
Breyer	9	2	0	0%	20%	33%	21%	0%	18%	43%	20%
Sotomayor	9	2	0	0%	0%	0%	15%	0%	22%	29%	17%

* Percentages represent the number of majority opinions authored divided by the number of times a justice was in the majority for a signed opinion.

SCOTUSblog Stat Pack | October Term 2017 | Interim Stat Pack | Wednesday, June 20, 2018

*The conservative line includes the combination of Roberts, Kennedy, Scalia/Gorsuch, Thomas and Alito; the liberal line counts the combination of Kennedy, Stevens/Kagan, Souter/Sotomayor, Ginsburg and Breyer. All other alignments of five-justice majorities are grouped into the "other" category.

Thomas (1)

Majority Opinion Distribution by Senior Justices

For each case decided with a merits opinion, the author of the majority opinion is selected by the most senior justice who votes with the majority. For example, in *Sessions v. Dimaya*, a 5-4 decision in which Justices Ginsburg, Breyer, Sotomayor, Kagan, and Gorsuch voted in the majority, Justice Ginsburg (the most senior justice in the majority) assigned authorship duties to Justice Kagan (the author of the majority opinion). The tables below demonstrate how the five most senior justices on the court assigned majority opinions during OT17 when they had the chance. For unanimous cases we have showed only statistics for Chief Justice Roberts because he is always the most senior justice in the majority for unanimous opinions.

## Justice Agreement - 5-4 Cases

Gorsuch 9

88%

#### Justice Agreement - Highs and Lows

The following tables list the justice pairs with the highest and lowest agreement rates based on both metrics for justice agreement—i.e., all cases and non-unanimous cases only—when justices agree in full, part or judgment only. Non-unanimous cases are those in which at least one justice dissented; cases that produced only a majority opinion and one or more concurring opinions are not included in that measure.

		Highest Agreeme	nt		Lowest Agreem	ent
	1	Thomas - Alito	96.3%	1	Thomas - Sotomayor	57.4%

### **Pace of Grants**

* The Minimum Distribution Pace presented in this chart reflects the number of petitions that must be granted to fill the court's docket for oral argument while giving the litigants in each case a complete or near-complete briefing schedule. The pace also reflects the number of petitions raised at each conference and other factors affecting the certiorari process.
