\* You can find past Stat Packs here: <<https://www.scotusblog.com/reference/stat-pack/>>. A few matters regarding our methodology are worth mentioning at the outset. First, SCOTUSblog treats consolidated cases as a single case, as determined by the case with the lowest docket number (prior to the release of an opinion) or the case that is captioned with an opinion. To the extent that two cases are argued separately but later decided with only one opinion, we will remove one of the cases from this Stat Pack, except to include it in the Pace of Grants chart to maintain cross-conference comparisons. The most unusual way we manage these later-consolidated cases is to merge the oral-argument data for the two cases. We combine the questions asked by each justice in the separate oral argument proceedings into one “consolidated” session. Second, this Stat Pack frequently uses the term “merits opinions,” “merits docket” or “merits cases.” Those three terms are used interchangeably, and signify the set of cases decided “on the merits.” Those cases include signed opinions after oral argument (the bulk of all merits cases), most per curiam opinions released after oral argument, summary reversals (cases decided with per curiam opinions without briefing or oral argument, often to reverse a lower court), and cases decided by an equally divided (4-4) court. Cases that are dismissed as improvidently granted are not included in our tally of merits cases.

\* For the circuit scorecards only, we treat certain consolidated cases as separate decisions rather than as one. For consolidated cases that stemmed from different lower court decisions, such as the cases consolidated as *United States v. Stitt*, we counted the cases separately on this table to most accurately reflect the Supreme Court’s treatment of the precedents below. For cases that were consolidated in the court below, such as the two petitions from the U.S. Court of Appeals for the 4th Circuit in *The American Legion v. American Humanist Association* and *Maryland-National Capital Park and Planning Commission v. AHA*, we count the Supreme Court’s decision only once. Throughout the rest of the Stat Pack consolidated cases are uniformly treated as a single case.

\*\* For purposes of the Circuit Scorecard, we include as “affirmances” merits opinions that let stand the lower-court opinion, such as Justice Ginsburg’s opinion in *Virginia House of Delegates v. Bethune-Hill*, in which the court held that the appellants lacked standing and dismissed the appeal. Similarly, we include as “reversals” opinions that may in fact only vacate the lower-court decision and remand for further consideration, such as Justice Thomas’ opinion in *Parker Drilling Management Services, Ltd. v. Newton*.

\*\*\* The circuit scorecard does not include *Emulex v. Varjabedian*, which was dismissed as improvidently granted. *Carpenter v. Murphy* is counted under the scorecard for October Term 2019.

# Circuit Scorecard

This chart features affirmance and reversal rates for each circuit and each justice. The first number is the number of times a particular justice voted to affirm a decision of the court below and the second number is the number of times that justice voted to vacate or reverse the decision below.

\* We treat cases with eight or fewer votes as if they were decided by the full court. For 8-0, 7-1 and 6-2 decisions, we simply assume that the nonparticipating justice would have joined the majority. In cases that are decided 5-3, we look at each case individually to decide whether it was more likely that the nonparticipating justice would join the majority or the dissent. Our assumption that nine justices voted in each case applies only to figures that treat each case as a whole, like the chart above, and not to figures that focus on the behavior of individual justices, like our Justice Agreement charts.

\*\* For cases that are decided by a 5-4 vote, we provide information about whether the majority was made up of the most common conservative bloc (Roberts, Thomas, Alito, Gorsuch and Kavanaugh), the most liberal bloc (Ginsburg, Breyer, Sotomayor and Kagan) along with any of the more conservative justices, or a more uncommon alignment. A conservative lineup is marked with a red square, a liberal lineup is marked with a blue square, and all others are marked with a yellow square.

\*\*\* For per curiam opinions, we assume that all justices who do not publicly dissent voted with the majority.

\*\*\*\* *Commerce* is classified as conservative because the five more conservative justices agree that the secretary of the Department of Commerce did not violate the enumeration clause or the Census Act in deciding to reinstate a citizenship question on the 2020 census questionnaire.

Term Index

This chart includes a summary of the cases for the term including (1) majority opinion author, (2) vote, (3) days between argument and opinion, (4) judgment, and (5) court below. For each sitting, the chart provides the number of majority opinions written by each justice and the average number of days between argument and opinion for that justice’s majority opinions.

# Makeup of the Merits Docket

The following charts depict different characteristics of the cases that were released with merits opinions. These charts include information about cases disposed of with signed opinions, summary reversals or affirmances by an equally divided court.

Court Below

Jurisdiction

Docket

Nature

\* Technically, all paid and in forma pauperis cases have been on the same docket since 1971, with paid cases beginning each year with case number 1, and IFP cases beginning at number 5001. Original cases remain on a separate docket and follow a separate numbering convention. For more information on the dockets, see Eugene Gressman et al., "Supreme Court Practice" 55–56 (9th ed. 2007).

# Total Opinion Authorship

The number of opinions five pages or longer is included in parentheses and represented by the thicker bars in the chart below.

# Unanimity

To take a closer look at unanimity at the court, we created three distinct measures of unanimity. The measures of unanimity are defined as follows:

**Measure #1:** When all justices simply voted for the same judgment – i.e., whether to affirm or reverse the judgment below. This is the broadest measure of unanimity because it allows for justices to write separate opinions – and sometimes even conflicting ones – as long as each justice voted to affirm or reverse the decision below.

**Measure #2:** When all justices joined some part of the same majority opinion, but one or more justices (1) wrote separately to state an individual position or (2) did not join the majority opinion in full.

**Measure #3:** When all justices joined a single majority opinion in full, without any justices writing separate concurring opinions. This is the narrowest measure of unanimity because it requires that the justices agree in full and without any written reservations or additions.

		Measure #3	All Justices in Total Agreement	19	26.64%
		Measure #2	All Justices Join the Majority Opinion	24	33.33%
		Measure #1	All Justices Vote For the Same Judgment	28	38.89%
Divided			Justices Disagree On Whether To Affirm, Reverse, Or Vacate The Decision Below	44	61.11%

\* Note that Measure #2 incorporates the cases captured in Measure #1, just as Measure #3 captures those cases included in Measures #1 and #2. For more information on our measures of unanimity, see Kedar S. Bhatia, A Few Notes On Unanimity, SCOTUSblog (July 10, 2014 10:40 AM), <<http://www.scotusblog.com/2014/07/a-few-notes-on-unanimity/>>.

\* For the purposes of this chart, a “Conservative Victory” occurs whenever the majority consists of Chief Justice Roberts and Justices Thomas, Alito, Gorsuch and Kavanaugh. A “Liberal Victory” occurs whenever the majority consists of Justices Ginsburg, Breyer, Sotomayor, Kagan and one conservative. An ideological split occurs with either of these two types of victories.

\* These percentages consider how often a justice writes the majority opinion when that justice is in the majority.

# 5-4 Cases

\*For OT10 through OT17, a victorious conservative majority (in red) includes Kennedy, Roberts, Scalia/Gorsuch, Thomas and Alito. A victorious liberal majority (in blue) includes Kennedy, Ginsburg, Breyer, Sotomayor and Kagan. Different majorities are marked in yellow.

\*\*For OT 18, a victorious conservative majority (in red) includes Roberts, Thomas, Alito, Gorsuch and Kavanaugh. A victorious liberal majority (in blue) includes Ginsburg, Breyer, Sotomayor, Kagan and one other justice. Different majorities are marked in yellow.

# Majority Opinion Distribution

For each case decided with a merits opinion, the author of the majority opinion is selected by the most senior justice who votes with the majority. For example, in *Herrera v. Wyoming*, a 5-4 decision in which Justices Ginsburg, Breyer, Sotomayor, Kagan and Gorsuch voted in the majority, Justice Ginsburg (the most senior justice in the majority) assigned authorship duties to Justice Sotomayor (the author of the majority opinion). The tables below demonstrate how the five most senior justices on the court assigned majority opinions during OT18 when they had the chance. For unanimous cases we have showed only statistics for Chief Justice Roberts because he is always the most senior justice in the majority for unanimous opinions.

# Pace of Grants

The following chart plots the pace at which the court fills its merits docket for a given term. Each date marker represents the conference within a given sitting. For instance, Feb #3 is the third February conference, which, during OT18, took place on March 1, 2019. Categorizing grants by their conference within a given sitting ensures more accurate cross-term comparisons.

\* The Minimum Distribution Pace presented in this chart reflects the number of petitions that must be granted to fill the court's docket for oral argument while giving the litigants in each case a complete or near-complete briefing schedule. The pace also reflects the number of petitions raised at each conference and other factors affecting the certiorari process.

# Pace of Opinions

The following chart plots the pace at which the court releases merits opinions throughout the term, beginning in October and ending in June. This chart includes both opinions released after full briefing and summary reversals. Here, as in the Pace of Grants chart, cases are categorized by their release within a given sitting, rather than by calendar month. For example, the opinions for Feb #3 of OT18 were actually released on March 4, 2019.

# Oral Argument - Justices

For our purposes, the number of “questions” per argument is simply the number of times a given justice’s name appears in the argument transcript in capital letters. To account for the chief justice’s administrative comments – such as his call for an advocate to begin – his tally for each case has been uniformly reduced by three “questions.”

Average Number of Questions Per Argument	
	Average
Sotomayor	23.9
Breyer	18.8
Kavanaugh	15.5
Kagan	15.2
Gorsuch	14.6
Roberts	13.6
Alito	13.4
Ginsburg	8.3
Thomas	0.0

\* We adopt Richard Lazarus’ definition of an “expert” Supreme Court litigator: one who has argued five or more times before the Supreme Court or works in an office where lawyers have collectively argued more than 10 times. See Richard J. Lazarus, “Advocacy Matters Before and Within the Supreme Court: Transforming the Court by Transforming the Bar,” 97 Geo. L.J. 1487, 1490 n.17 (2008).

\*\* An advocate’s “origin” is simply the state of origin listed for that lawyer on the court’s monthly hearing lists. If attorneys from the Office of the Solicitor General are omitted, lawyers based in Washington, D.C., appeared 59 times during OT18.

\*\*\* The percentage figures for this category omit all advocates from the Office of the Solicitor General. They demonstrate the percentage of female advocates from positions other than those within the Office of the Solicitor General as a percentage of all men or women arguing from positions other than those within the Office of the Solicitor General.
